Experience

Full-stack Software Developer

July 2024 - Dec 2024

Build an online sales system

• Feature development:

- Developed the User Interface (UI) for the e-commerce platform, ensuring an intuitive product browsing and purchasing experience across desktop and mobile devices.
- Engineered core features such as customer authentication, shopping cart, order processing, and integrated payment gateway for secure transactions.
- Implemented product catalog and inventory management modules, enabling administrators to manage product details, categories, stock levels, and pricing dynamically.
- Built an order tracking and customer notification system to update buyers on their order status via email and in-app notifications.
- Developed a reporting and analytics module to generate insights on sales performance, customer behavior, and inventory turnover, supporting data-driven decision making.
- Integrated a review and rating system to enhance customer trust and provide feedback loops for products and services.

• **Technology stack:** ReactJS, NodeJS (ExpressJS), PostgreSQL, Redis, Ant Design, Socket.IO, RabbitMQ, Docker.

Vietinfo company intern

June 2024-August 2024

Transport statistics interface

• Feature development:

- Developed an interactive transportation dashboard that visualizes real-time traffic data, road usage, and congestion levels through dynamic charts and maps.
- Built a transportation management module enabling administrators to monitor vehicle flow, accident reports, and route performance, with filtering and comparison features for decision-making.
- Integrated external APIs and IoT sensors to collect data on traffic density, travel time, and public transport schedules, ensuring accurate and up-to-date information.
- Implemented reporting and analytics tools to generate statistical summaries, trend forecasts, and performance indicators for transportation planning and optimization

• **Technology stack:** AminLTE, NodeJS (ExpressJS), HTML, Javascripts, CSS, Bootstrap.

Education

High Quality Information Technology, Can Tho University

Sept 2020- April 2025

Toeic Academic

June 2021- Sept 2021

- **Band:** 450 and B2

Skills

Frameworks & Libraries:

- NodeJS, ReactJS, NextJS, Flutter,Vue JS, Tailwind.

Databases:

- PostgreSQL, MySQL, Oracle, MongoDB.

Programming Languages:

- Javascript, HTML5, CSS3, C++.

Tools:

- Git, Docker, Datagrip, Figma.

Soft-Skills:

- Teamwork, Open-minded, Problem-solving.

Languages:

- Vietnamese, English.
